🎯 Objective

- Seeking a junior cybersecurity position to apply theoretical knowledge and gain hands-on experience in penetration testing and IT security operations.
- Eager to apply theoretical knowledge and gain hands-on experience in cybersecurity, penetration testing, and IT security operations.

🎓 Education

- Earned Bachelor of Artificial Intelligence with Cybersecurity Track at Horus University Egypt (HUE), start year 2024/2025, expected graduation 2028/2029.
- Flexible with relocation and remote work opportunities

🛠️ Technical Skills

- Proficient in operating systems including Linux with basic to intermediate skills, and programming languages such as Python and Java. Knowledgeable in cybersecurity techniques including Red Teaming, Blue Teaming, and Cyber Defense, with a foundational understanding of network protocols and OSI model. Also familiar with IT fundamentals.

💼 Training & Internships

- Cybersecurity trainings at Horus University Egypt (HUE), including awareness sessions and hands-on lab-based technical exercises."

💻 Projects

- Developed a simple port scanner using Python, a CLI tool for scanning open ports on a target host, and created Linux hardening scripts using Bash to enhance security on Ubuntu servers.

🌐 Languages

- Arabic: Native
- English: Intermediate (85%)

💡 Additional Information

- Open to relocation and remote work opportunities
- Passionate about cybersecurity and ethical hacking
